Corporate, Web, Human Resource, Trainning

1 ABSTRACTION

The Corporate Connection is a Web Application for companies to get easy connection between big companies and small companies through online. This system was intended to develop a web application for Corporation to perform various functionalities like hiring employees, booking venues and manage human resources and hiring trainers for companies. This system is helpful to employees to get the job or employment, before this application implementation the manual selection process is working its very time consuming with the help of this web application the big companies communicate with small manpower and venue provider companies and easily manage the human requirement needs for their companies. This manual process requires man power and more time consuming. The Corporate Connection System is based on Web Application and website for details of the companies. To avoid such difficulties, I want to implement this system.

2 PROJECT PURPOSE

To identify options to produce "THE CORPORATE CONNECTION" this system provide a combination of services and maintaining the service at same platform, this service is used to improve and build the connection between corporation and company that require manpower ,trainers and venue with different computer systems and other component for different purpose.

3 THESIS STATEMENT

The Corporate Connection is a web application for the Corporation to carry out various functions such as hiring employees, booking facilities and managing company human resources and hiring trainers.

4 LITERATURE REVIEW

The Existing system review of website and web application that provide service on internet the manpower, venue and training provider to companies and corporation for different work. Some website provide the details about companies that provide manpower that required by big companies and corporations. Some website also have different context but similar approach.

- **Manpower Provider** Manpower Provider and management services on internet that provide manpower provider companies details on via websites this website show only show the contact details and address on website. This system show only details of company that provide manpower service. [4, 7] And after contact to company that company manage different type of services like permanent recruitment ,temporary staffing services , contract staffing ,outsourcing ,mass recruitment ,HR ,labour safety Labour Legislation Consulting ,Professional Skill Testing ,Excusive Search Selection , Outplacement Services , Skill Building program, payment survey ,call centre staffing , exam supervision staffing. With temporary staffing services, manpower provides you with skilled, efficient employees who understand the value of performing high quality work. Manpower one of the pioneers in providing mass recruitment services for banking, telecom, retails, logistic, manufacturing, exam supervision and other business sectors. Executive Search Selection is the process of recruiting top manager and/or high-calibre professionals. With contract staffing services, manpower becomes an employer to the people who you want to work for your company but who are to be employed indirectly.

- **Venue Provider** Venue is 'An Obvious part of event successes'. Venue are used for different event and have different requirement for event. Venue provider in existing system provider the details of venue provider contact details address and images of venue and different utilities that are available at venue. Different event management system use to collaborate with place and men power. While getting a venue detail scheduling is also important. [6] [3] [5] Some company are require venue according to event for technical seminar so computer projects and speaker and other utilities and equipment are needed at venue. Venue selection based on different factors like location of venue, matching the venue to the theme, matching the size of the event to venue capability, venue layout including sight lines and seating configuration, every history/ portfolio and reputation, availability. Venue management based on venue design, venue organisational structure, event process, multiple events in venues, contracts, pricing, partnerships.

- **Training Provider** Training is the immediate improvement requirement to employees. I.e. Skills and knowledge to perform their task in the organization. Employee training to improve the skill and knowledge of employee to perform the assigned task. When company hire new employees or change of job or promotion and rotation, also new technology or software upgrade else system upgrade the training is required. Some training providing software and papers on this kind things. I took as a reference and methods of that systems. [2] [1] [8] This training to assist employee to sharpen their personal skills to handle the crucial situation

in organization. This training provider service provide the trainer to different company that they require. The training process based on conduct training need analysis, develop training objectives, design select training methods, implement training, evaluate training, measure training results.

5 PROBLEM SPECIFICATION

Day by day world population is increasing and also with increasing Companies and Corporation to accommodate the population growth. With the increasing population demand and jobs in different sectors are also increasing in industries. In the present scenario manpower provider and venue and training provider services are done through call and online contact finding and or different service provider companies, which are limited source of details and also less accurate data for the company's requirements. There is a big need of new web-application or system for company to manage resource, which required to company and help to achieve the company and corporation demands. These can result into decentralised Company requirements and conditions which can reduce load on overall company to maintain resource and also the cost of distribution to some extent. High rise manpower and venue with lot of utilities also consume lot of money for maintain the utilities which increases and effect on company, so there is need to create the corporate connection system or web application to reduce cost of management of manpower and venue requirement and also training facility at same platform and maintaining services to improve connection to company.

6 OBJECTIVES

- To analyse different methods for Manpower Management, Venue Details and Supplier requirement to Corporation.
- To understand and analyse methods which uses renewable resources to maintain Connection between Corporations.
- To identify a new source and method for Build connection between corporation and companies for Services management.
- To identify ways to utilise knowledgeable human resource for company and corporation for different services and utilities.
- To provide the best and easy human resource management services and venue and training provider services at same platform.
- Any latest notifications of requirement of company are directly put on the portal login or also sent through SMS/Email.
- Company check attendance of temporary manpower people and also online report of attendance and requirement is also included.
- One Stop Destination: - it provide many services at one platform.
- Less Time Consuming: - all services provide at one platform so it's less time consuming and easy to manage.
- Attendance facility: - employee attendance report generate online.

7 METHODOLOGY

8 PROJECT PLAN

The Corporate Connection

Task No.	Task Name	Starting
1	Thesis Praposal	Feb-19
2	Learing Process	Nov-19
3	Framework of Web Application	Dec-19
4	Implimantion of User InterFace	Jan-20
5	Testing Of Website	Feb-20
6	Modification If Needed	Mar-20
7	Review With Advisor	Apr-20
8	Presentation	May-20

9 CONCLUSION

The Corporate Connection is web application that connect different types of user on one platform and reduce amount of work. This system was intended to develop a web application for Corporation to perform various functionalities like hiring employees, booking venues and manage human resources and hiring trainers for companies.
